OBJECTIVE

An ambitious engineer with a multidisciplinary foundation in computer engineering, data science, and statistics developed through continuous research and hands-on experience. Seeking an environment focused on the future of technology to gain skills in machine learning, statistical predictive modeling, and AI-embedded systems.

EDUCATION

California State Polytechnic University, Pomona

August 2025 - Expected Graduation: May 2029

Bachelor of Science: Computer Engineering

GPA 3.76

Minors: Data Science, Statistics

Relevant Coursework: Python, Digital Logic Design, C/C++, Statistics, Circuit Analysis, Microelectronics, Fundamentals of Data Science, Microcontrollers, Object Oriented Programming.

PROFESSIONAL EXPERIENCE

Undergraduate Research, Digital Systems Engineering

May 2026 - Present

Exploration and Space Technologies - Digital Engineering Lab

- Currently launching the Digital Engineering Lab: will deploy a local LLM and RAG pipeline on Apple Silicon with MLX-LM to generate engineering-informed CAD modifications validated through 3D scanning and additive manufacturing.

Intern, Data Analyst

June 2025 - August 2025

Arakelian Enterprises Inc. - Athens Services, Pacoima

- Used SSMS to join, query and clean two databases containing 30,000+ records for Ventura and Orange County accounts.
- Supported Salesforce application development, including the Field Service mobile app, to streamline business workflows.
- Updated low-code applications in AppSheet to automate internal processes and improve operational efficiency.
- Gained familiarity with Tableau by assisting in creating dashboards that translated queried data into actionable insights.
- Participated in developing an AI-powered database with a custom UI, integrating user-friendly design with data management while gaining exposure to UI/UX and full-stack development through Flynet Studios.

TECHNICAL EXPERIENCE

Northrop Grumman Collaboration Project

August 2026 - Present

Unmanned Ground Vehicle, Firmware Subteam

- Contributing to STM32 embedded firmware development for a Northrop Grumman-sponsored autonomous emergency-response vehicle.
- Serving as a liaison between firmware, autonomy, and integration subteams to ensure communication and coordination across the software team.

TECHNICAL PROJECTS

Event Management Web App

- AI-assisted, designed, and deployed full-stack Event Management Dashboard with React, TypeScript, PostgreSQL (Neon), Git, GitHub, Express.js, Vercel, and Render, implementing event tracking, multi-select audience management, advanced filtering and sorting, CSV export functionality, logistics planning, and real-time CRUD operations for College of Engineering event.

Personal Portfolio Website

- AI-powered personal portfolio website to create a visualized website showcasing information about me through GitHub using HTML/CSS/JavaScript.

LEADERSHIP EXPERIENCES

Dean's Student Advisory Board

August 2025 - Present

College of Engineering - Cal Poly Pomona

Executive Board Treasurer

August 2026 - Present

Southern California Engineering Technology Association - CPP Chapter

Executive Board Treasurer

August 2025 - May 2026

Engineers Without Borders - CPP Chapter

ADDITIONAL INFORMATION

Programming & Software: Python, SQL SSMS, Tableau, HTML, CSS, JavaScript, TypeScript, React, Node.js, PostgreSQL

Tools & Technologies: Git, GitHub, MLX-LM, RAG, LLM, VS Code, Vercel, Render, Neon PostgreSQL, Express.js, REST

APIs, LTSpice, Autodesk Fusion 360, 3D Scanning, FDM 3D Printing, Salesforce, Appsheet, Microsoft Office

Soft Skills: Discipline, Languages (Armenian, English, Russian), Communication, Time Management, Work Ethic

Awards/Honors: National Honor Society Member (2025), Alpha Lambda Delta Honor Society Member (2026)
